It is occasionally mentioned that the God/Nature *interface* lies at the Math/Physics border. Physics requires “Momentum” in *forward* time/space, whereas Math satisfies itself with “Number/Formula” in *forward/backward* time/space, *i.e. imagination*, only. The *interface* itself requires “Quantum”, which shares peculiar characteristics of both worlds (Entropy & Syntropy), while responding – individually & collectively – to the $0 \leftrightarrow 9^\circ$ or “*nothing \leftrightarrow everything*” most unique existential condition of the evolving reality we live in. Two steps forward, one back... Homo sapiens, 3G ruling program, [440Hz-logged in pineal gland](#), instinct, fight-or-flight, fentanyl...

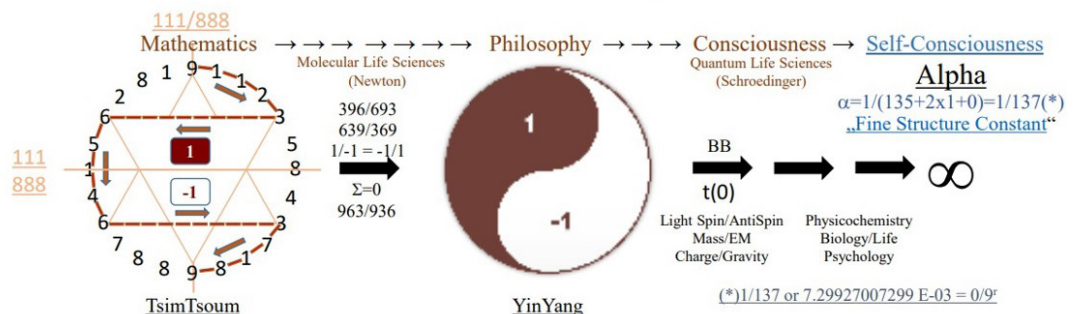

The infamous irreversible evolutionary principle of systems at non-equilibrium, i.e. in time/space. Ours?

It is also rumored/said that God/Nature always leaves a trace of its past. Just in case. A universal unique constant remains as of today a total enigma, *i.e.* the “[Fine Structure Constant](#)” of $\pm 1/137$, unit less. Fibonacci was first at pointing out – as a fervid mathematician – at the fact that Nature’s shapes on Earth were hiding a Secret, much later coined the “[Secret of the Universe](#)”, *i.e.* a particular $0 \leftrightarrow 3^6 \leftrightarrow 9^\circ$ number series which – when assembled geometrically – leads to a self-annihilating construction/concept, with – at its *interface* – a stationary wave-like $0 \leftrightarrow 1-1$ vibration... A thousand years ago, nobody paid attention to Fibonacci’s enlightenment, the “*Mad/Math Guy who yearns to cross path with God*”. Lucky him/us, most probably. It is only recently within most advanced *freewill* environments flourishing from past enforced *copy/paste-type* obscurantism that Sciences did dare the Truth: indeed, the [Fibonacci Series](#) could well reveal/unveil the “Secret of the Universe”.

Fibonacci Series → Decimal System → Alpha

All 9 (3x3) Yin/Yang Solfeggio frequencies (174/825.285/714.396/693.417/582.528/471.639/369.741/258.852/147.963/936Hz) = $0/9^\circ$

Self-instructed TsimTsoum/YinYang Program
(Fibonacci) $\Sigma(911235843718988764156281) = 117/9^\circ$

Note the *numerical* sum difference (18/9°) between the Fibonacci series (117/9°) and its reading (135/9°) as a self-instructed self-annihilating program (0/9°) for the expression of light spin/antispin (1/-1), including the $2x\ 3 \leftrightarrow 6$ invertors (396/693) accounting for that difference, and the „Alpha“ denominator ($\alpha = 1/(135+011)$) for entering the time/space decimal system upon enlightenment (*self-consciousness*).

The Fibonacci Series as a YinYang/TsimTsoum (YY/TT) yet unique most single spontaneous arrangement of the $0 \leftrightarrow 9^\circ$ existential condition of our Galaxy and all it contains, leading de facto to the 1st Photon as the 180° superposition (*Δphase/pitch*) of its two constitutive \pm twin spins 1/-1 with - as an interface remnant – the “[Fine Structure Constant](#)”!

Remember

Never dare to close your Mind. Curiosity/Knowledge knows no Frontiers. Add Cognition & Self-Consciousness and you have a Human, *i.e.* Homo *modestis*. Humanity culminates to a point where reconciliation is in dire need for further HF^2 advances. Try to progress where you are weak³, to share/be patient where you are strong⁴, and to encourage your Mentors with a positive attitude⁵. It is all about time/space, vibration, and cell membrane fatty acids, *i.e.* the mind, all led by cognition and self-consciousness, *i.e.* the human brain. Hats off, Fibonacci.

True Love in Hebrew/German sounds different due to the Phase/Pitch⁶, not the Amplitude/Frequency.

“The Tissue is The Issue”⁷

Homo *sapiens* must be encouraged/led towards their true reason of being, which is to serve Humanity. Not by competing against each other, but rather from well thought off contributions, from giving away the whole of them, the whole of it, in which particular case there is no need for translation, worldwide, universally. It simply is the evolutionary definition/vibration/dimension of true Love, *i.e.* Body/Mind ($0 \leftrightarrow 3^6 \leftrightarrow 9^9$) + Human Brain ($0 \leftrightarrow 1-1$), the antidote to death. True Love is about “Death Prevention”. Be safe. Love genuinely @ 432Hz.

¹ From a Darwinian perspective, the alpha constant ($\alpha = \pm 1/137 = 9^9 = 0$) appears to be a remnant of our most single common ancestor pre- BigBang (*be It what it may*), an imaginary mathematical self-annihilating double twin spin of infinite frequency ($0 \leftrightarrow 1-1$), in improbable resonance with everything ($0 \leftrightarrow 9^9$), evolutionary achieving differentiation ($0 \leftrightarrow 3^6 \leftrightarrow 9^9$), *i.e.* us, as we speak, ± 13.8 billion years later...

² Read *Human Intelligence*. Awaiting/encouraging desperately conservative Homo sapiens...

³ Accept Yourself Un-conditionally! Then, only, work (un-conditionally) on it. That is Self-Love. Because, You deserve (are worth) it...

⁴ Don't accept fate. Please. From Homo sapiens to Homo modestis. A mind mutation away... Vision.

⁵ Keep re-visiting your kind self... SHEN Yun... It all belongs to the wise/intelligent Class... the Authentic Elite.

⁶ Try to abstract the phase/pitch (Time/Space) and to decipher/absorb the Human vibration (Entropy/Syntropy) from the Math Contribution.

⁷ The original smile expression “The Tissue is The Issue” was technically introduced in little USA Bastogne in support of the market introduction & development of the then established scientific knowledge that 85% of all death worldwide – annually – find their origin in chronic tissue inflammation & associated degenerative diseases, *i.e.* an omega-963/9⁹ ratio away...
