Citation: DE MEESTER F. Sandbox 396. Int J Psychiatr Res 2023; 6(5): 1-2.

Power Elites & Civil Servants are in resonance/disguise, a mind/body disease away from each other. 396-derived appropriate treatments are essential & urgent. *The Middle Class pulls the wagons.*

Seen from the Universe’s perspective, Earth appears as a kindergarten’s sandbox, indeed. All that occurs in there appears as if guided by a continuous bi-directional exchange of information (tytes/396/-101) dwelling while dancing at the subquantum non-temporal immaterial level and the tangible tempo-material agitated scenery continuously (re)shaping and exposing itself in/on the sand. Reaching the cognitive point that we – *Humans* – and “the rest of it” are not there 50% of the time is puzzling after all. There is nothing (0), not even space/time, it simply is dark/empty, and – yet – we perceive us-and-all as everything (9^r), simply because we evolved to perceive it that way (*Natural Selection*). As awakening self-aware/-conscious beings, we start to realize the *Trick* and – of course – we have a difficult time with it (*Cultural Selection*). Mental/psychological disorders/diseases, episodic depressions in the first place, are around the corner, for each & all of us [1]. On the one hand, being an integral part of nothing↔everything consciously renders the big question of “where we do come from” superfluous and mostly irrelevant. On the other, the question of “where we are

heading to” gives us the power of our previous conceptualized Gods. A whole new chapter for the newly enlightened *Homo modestis* – read *Humanity* – must be elaborated on. Back to our pens and notebooks... The concept of the body – think of the *Homo sapiens*’ jungle standard and the primary level of (*wo*)men development with their basic body-derived art of all sorts – is rightly fading away to the benefit of the cognitive brain-mind association. The latter also is the most sustainable, if only environmentally. The next leap step of progress for *Humanity* lies in the realization and acceptance that *Homo sapiens* is/was not the last rung of the ladder. *Thankfully...*

396-Vibrations & *396-Fatty acids* is all that is needed (0↔9^r) to bring *people* back to where they belong, a mind *frequency*↔*body amplitude* relaxing state in between “*nothing*” & “*everything*”, where they can individually self-reflect on a common sense/purpose of being for the continuous progress of *Humanity* as a Whole, *ie 396-Resonance* (*Homo modestis*↔*sapiens*, Human↔Nature).

Syntropy

Gravity, black holes, electromagnetism are about *Syntropy*, not forward time/space, not matter/charge, not light. It is about Science that you can *feel*, not touch. The 20th Century Science. “*Psychophysics*”.
